

Front-End Lead Developer B2C Web

// Do you like Games?

// Are you interested in sports?

Watching football is no longer just a topic for people interested in sports. The crowd is paying more and more attention on gaming - even spend money on it. That's why SOCIAL GAMING is worth to connect to live broadcasted football matches. GOALENT will run GOALBINGO.de / GEsports in App-Stores as a Social Gaming Platform / - APP that is exclusively using live data of the ball and the goal on the pitch. GOALENT is 2nd screen entertainment during live football matches, which will boost up amongst social media platforms.

GOALENT is inancially backed by a FIFA Licensed Goal Line Technology System, a former world class football player and todays football manager, an international gaming expert and an international Investment Group. We startup developing a disruptive mobile solution that helps app publishers all over the globe to generate more revenue. Our mission is to develop technologies that reach billions of smartphone and web users in a rapidly growing gaming market.

If you want to be part of the NEXT BIG THING in App Entertainment and work with some of the best people in the gaming industry, then go for it and send us your application!

// Immediatly // unlimited contract //

- You are building a gaming platform used by international customers worldwide in sports, entertainment and publishing industry.

// Your profile

- Lead an Agile team of Developers and QA through the Sprint cycle.
- Keep team members motivated and engaged while maintaining a positive team environment.
- Work with our Product Management to understand and refine requirements for the team.
- Foster collaboration and communication within the team.

- Work with other teams to do root cause analysis on production issues.
- You will mentor other developers using your experience with advanced Unity concepts.
- You will help standardize and encourage the use of proper design patterns and best practices.
- You will analyze, design, prototype, program, test and support - the complete software lifecycle in your hands!

// Requirements

- Experienced front-end-developer.
 - 5+ years of experience with HTML5, JavaScript/TypeScript, CSS.
 - 3+ years of demonstrated experience with one or more modern JavaScript libraries such as React, Angular, Backbone, etc.
 - Disciplined self-starter, capable of working independently and in close collaboration within an Agile development team.
 - Excellent communication, documentation, and collaboration skills.
 - Strong administrative/organizational skills (ability to effectively prioritize, manage time, and meet deadlines on multiple projects).
 - Proficiency in spoken and written English is required.
 - As a Sr. Front-End Developer you will work within a cross-functional team of talented developers to create beautiful Webapps. Our work is technically challenging and also incredibly rewarding. This is a Sr. position and you will be expected to iterate quickly, write clear and reusable code, act as a tech lead, and mentor other developers.
